

## CS443 - Assignment 2

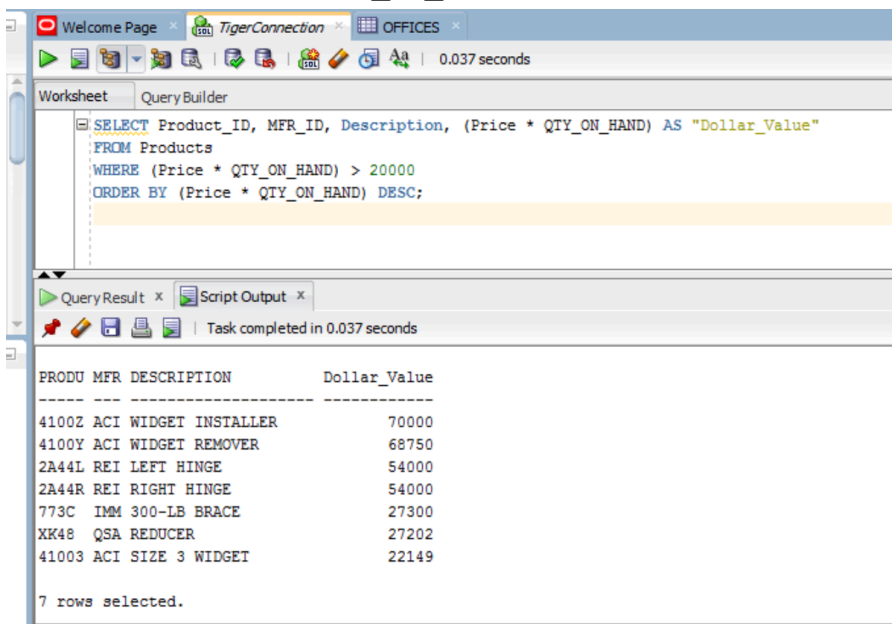

1) Write a select statement to list all the columns from the Offices table. 'Select \*' is not allowed. Return the list in DESC Office order.  
**SELECT Office, City, Region, MGR, Target, Sales**  
**FROM Offices**  
**ORDER BY Office DESC;**

The screenshot shows the TigerConnection Query Builder interface. The SQL query is entered in the Query Builder tab, and the results are displayed in the Query Result tab. The query is: **SELECT Office, City, Region, MGR, Target, Sales FROM Offices ORDER BY Office DESC;** The results are shown in a table with 6 columns: OFFICE, CITY, REGION, MGR, TARGET, and SALES. The data is sorted by OFFICE in descending order.

OFFICE	CITY	REGION	MGR	TARGET	SALES
22	Denver	Western	108	300000	186042
21	Los Angeles	Western	108	725000	835915
13	Atlanta	Eastern	105	350000	367911
12	Chicago	Eastern	104	800000	735042
11	New York	Eastern	106	575000	692637

2) List the product ID, mfr ID, Name (its description), and dollar value of quantity on hand (price \* quantity) of the products whose dollar value is greater than 20000. Return the list in descending order by their dollar value.  
**SELECT Product\_ID, MFR\_ID, Description, (Price \* QTY\_ON\_HAND) AS "Dollar\_Value"**  
**FROM Products**  
**WHERE (Price \* QTY\_ON\_HAND) > 20000**  
**ORDER BY (Price \* QTY\_ON\_HAND) DESC;**

The screenshot shows the TigerConnection Query Builder interface. The SQL query is entered in the Query Builder tab, and the results are displayed in the Query Result tab. The query is: **SELECT Product\_ID, MFR\_ID, Description, (Price \* QTY\_ON\_HAND) AS "Dollar\_Value" FROM Products WHERE (Price \* QTY\_ON\_HAND) > 20000 ORDER BY (Price \* QTY\_ON\_HAND) DESC;** The results are shown in a table with 4 columns: PRODU, MFR, DESCRIPTION, and Dollar\_Value. The data is sorted by Dollar\_Value in descending order.

PRODU	MFR	DESCRIPTION	Dollar_Value
4100Z	ACI	WIDGET INSTALLER	70000
4100Y	ACI	WIDGET REMOVER	68750
2A44L	REI	LEFT HINGE	54000
2A44R	REI	RIGHT HINGE	54000
773C	IMM	300-LB BRACE	27300
XK48	QSA	REDUCER	27202
41003	ACI	SIZE 3 WIDGET	22149

7 rows selected.

3) List the Order Number, Order Date, Customer Number, and Sales Rep Number for orders for part '779C' or '773C'. (Use a compound search condition - OR.)

```
SELECT Order_Num, Order_Date, Cust, Rep
FROM Orders
WHERE Product = '779C' OR Product = '773C';
```

The screenshot shows the TigerConnection interface. The top bar includes a 'Welcome Page' tab, a 'TigerConnection' tab with a SQL icon, and an 'OFFICES' tab. Below the tabs is a toolbar with various icons and a timer showing '0.065 seconds'. The main window is divided into two panes: 'Worksheet' and 'Query Builder'. The 'Query Builder' pane contains the following SQL query:

```
SELECT Order_Num, Order_Date, Cust, Rep
FROM Orders
WHERE Product = '779C' OR Product = '773C';
```

Below the query pane is a 'Query Result' pane with a 'Script Output' tab. The 'Query Result' pane shows the results of the query in a table format. The table has four columns: 'ORDER\_NUM', 'ORDER\_DAT', 'CUST', and 'REP'. The data is as follows:

ORDER_NUM	ORDER_DAT	CUST	REP
113007	08-JAN-18	2112	108
113048	10-FEB-21	2120	102
113003	25-JAN-17	2108	109

4) List the Name and Age of all Sales Reps in the following offices: 11; 13. (Use the set membership test - IN.)

```
SELECT Name, Age
FROM SalesReps
WHERE Rep_Office IN ('11', '13');
```

The screenshot shows the TigerConnection interface. The top bar includes a 'Welcome Page' tab, a 'TigerConnection' tab with a SQL icon, and an 'OFFICES' tab. Below the tabs is a toolbar with various icons and a timer showing '0.024 seconds'. The main window is divided into two panes: 'Worksheet' and 'Query Builder'. The 'Query Builder' pane contains the following SQL query:

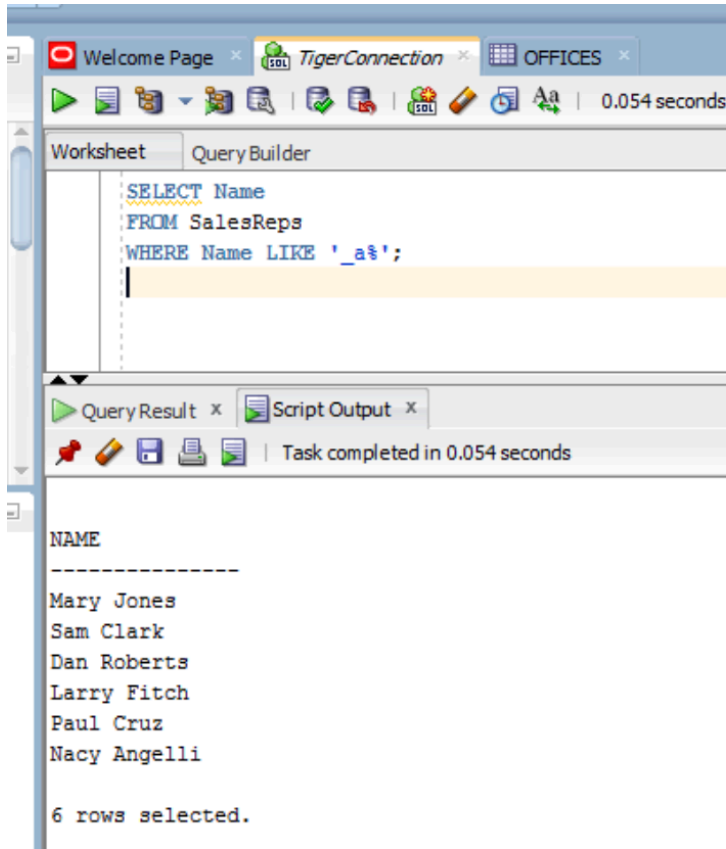

```
SELECT Name, Age
FROM SalesReps
WHERE Rep_Office IN ('11', '13');
```

Below the query pane is a 'Query Result' pane with a 'Script Output' tab. The 'Query Result' pane shows the results of the query in a table format. The table has two columns: 'NAME' and 'AGE'. The data is as follows:

NAME	AGE
Bill Adams	37
Mary Jones	31
Sam Clark	52

5) List the names of all Sales Reps who have the letter 'a' (this is lower case a) as the second character of their name.

```
SELECT Name
FROM SalesReps
WHERE Name LIKE '_a%';
```

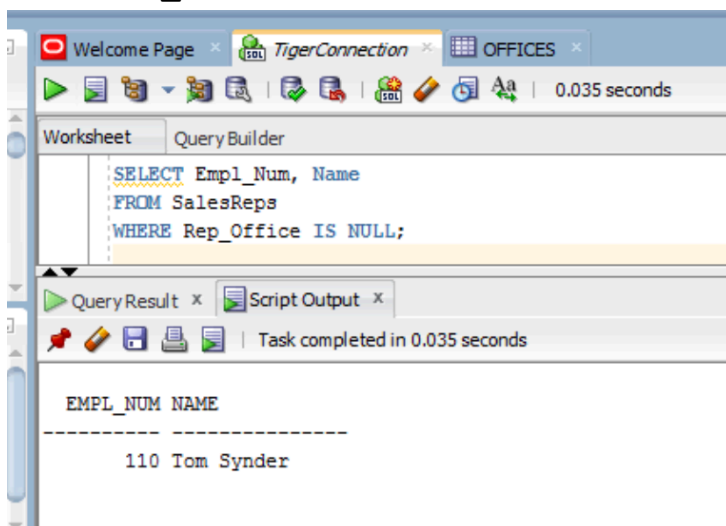

The screenshot shows a SQL software interface with a 'Query Builder' tab. The query entered is: `SELECT Name FROM SalesReps WHERE Name LIKE '_a%';`. The 'Query Result' tab shows the following output:

NAME
Mary Jones
Sam Clark
Dan Roberts
Larry Fitch
Paul Cruz
Nacy Angelli

6 rows selected.

6) Return the Sales Rep ID and Name of any Sales Rep not assigned to an office yet.

```
SELECT Empl_Num, Name
FROM SalesReps
WHERE Rep_Office IS NULL;
```

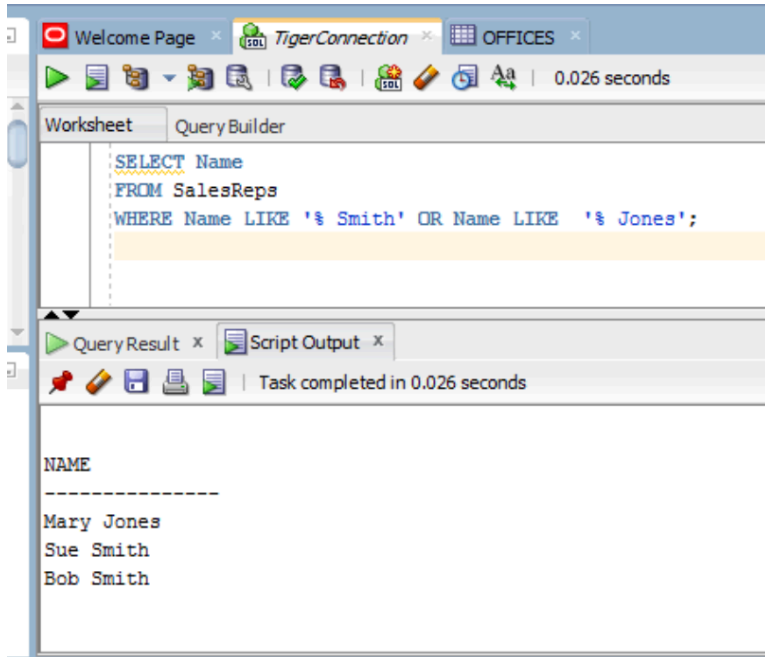

The screenshot shows a SQL software interface with a 'Query Builder' tab. The query entered is: `SELECT Empl_Num, Name FROM SalesReps WHERE Rep_Office IS NULL;`. The 'Query Result' tab shows the following output:

EMPL_NUM	NAME
110	Tom Synder

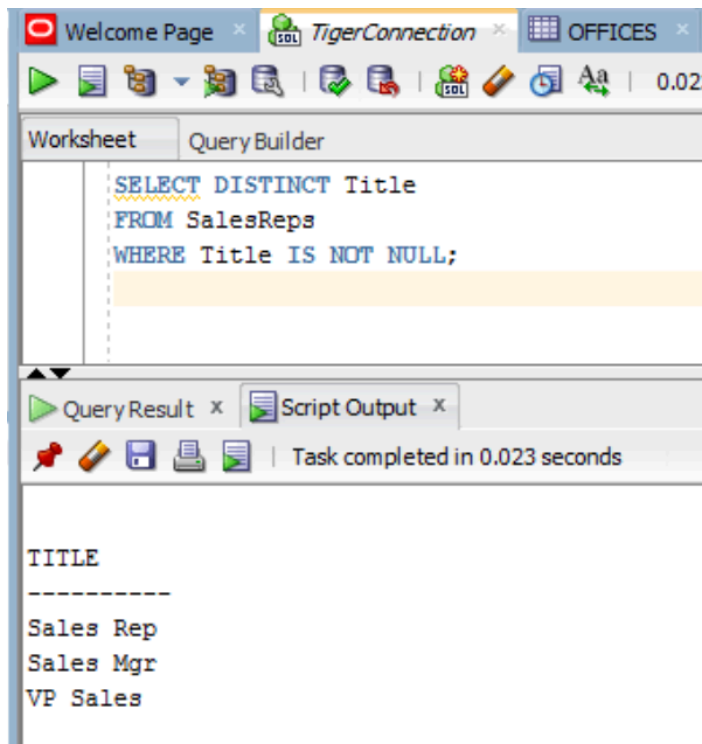

7) Show all the sales rep names with last name "Smith" or "Jones".

```
SELECT Name
FROM SalesReps
WHERE Name LIKE '% Smith' OR Name LIKE '% Jones';
```

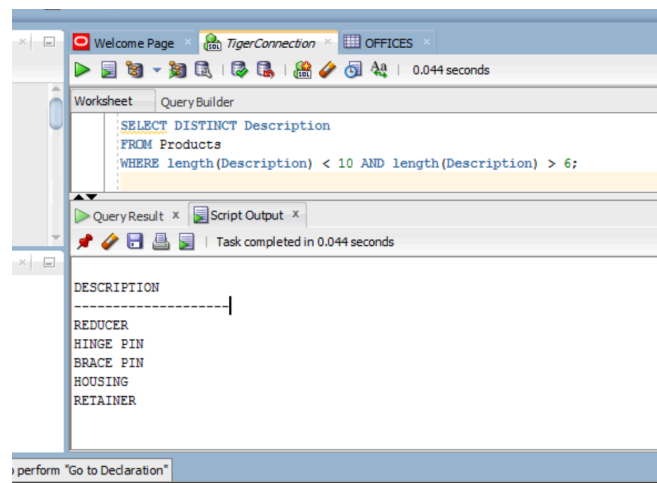

8) List different titles in the sales reps table. Only list each title once and unknown titles should be ignored. Duplicate rows are not allowed.

```
SELECT DISTINCT Title
FROM SalesReps
WHERE Title IS NOT NULL;
```

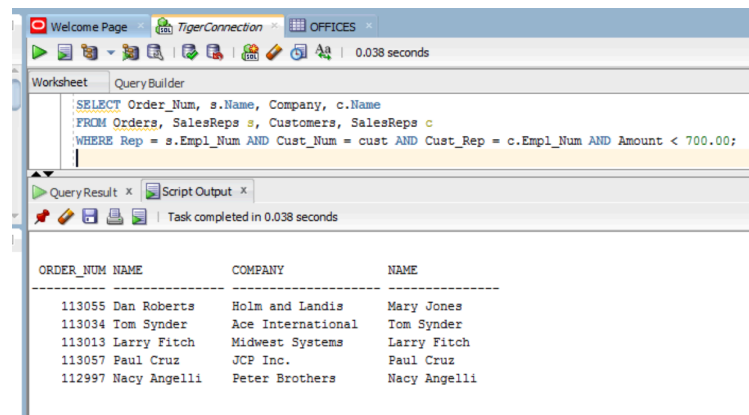

9) List the description of the products which are more than 6 character and less than 10 character long. No duplicate row is allowed. You can use the build in function `length()` to do this. For example, `length(name)` return the number of characters for attribute called "name".

```
SELECT DISTINCT Description
FROM Products
WHERE length(Description) < 10 AND length(Description) > 6;
```

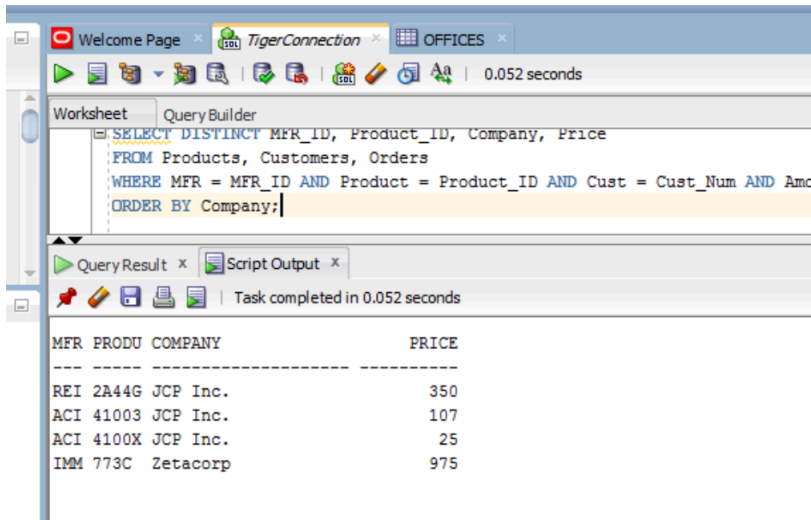

10) For all order **Amount less than \$700**, list the order num with the name of the rep who placed the order and the name of the customer who made the order and the name of the rep for that customer

```
SELECT Order_Num, s.Name, Company, c.Name
FROM Orders, SalesReps s, Customers, SalesReps c
WHERE Rep = s.Empl_Num AND Cust_Num = cust AND Cust_Rep = c.Empl_Num AND Amount < 700.00;
```

11) List the Mfr Id, the Product Id, Company and PRICE of all products bought by customers where customer number is one of (2111,2112,2105,2119) and where the amount of the order < \$10,000. Order the results by ascending Company. Duplicate row are not allowed.

```
SELECT DISTINCT MFR_ID, Product_ID, Company, Price
FROM Products, Customers, Orders
WHERE MFR = MFR_ID AND Product = Product_ID AND Cust = Cust_Num AND Amount < 10000.00
AND Cust_Num IN ('2111', '2112', '2105', '2119')
ORDER BY Company;
```

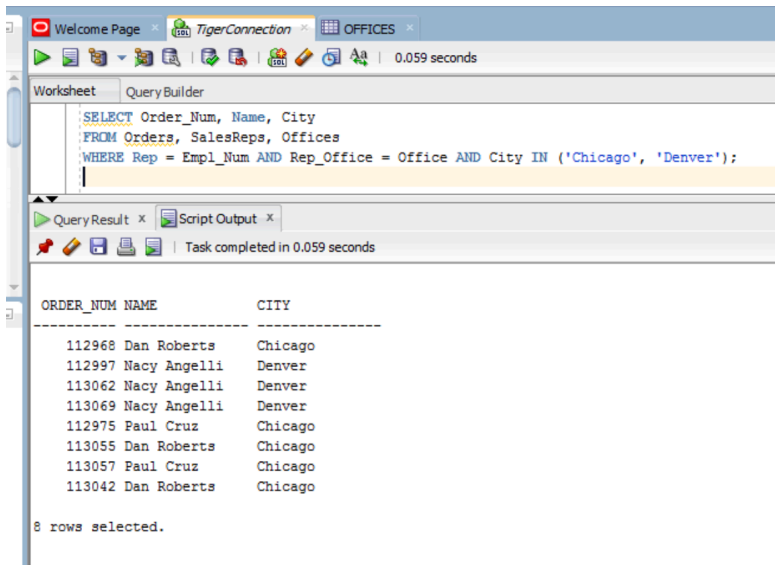

The screenshot shows the TigerConnection interface. The 'Query Builder' tab is active, displaying the SQL query for problem 11. The 'Query Result' tab shows the output of the query, which is a table with four columns: MFR, PRODU, COMPANY, and PRICE. The results are sorted by Company in ascending order.

MFR	PRODU	COMPANY	PRICE
REI 2A44G	JCP Inc.	JCP Inc.	350
ACI 41003	JCP Inc.	JCP Inc.	107
ACI 4100X	JCP Inc.	JCP Inc.	25
IMM 773C	Zetacorp	Zetacorp	975

12) List all orders number, the name of the rep who took the order , the city where the rep has his/her office. Print the employee whose office is in either Chicago or Denver;

```
SELECT Order_Num, Name, City
FROM Orders, SalesReps, Offices
WHERE Rep = Empl_Num AND Rep_Office = Office AND City IN ('Chicago', 'Denver');
```

The screenshot shows the TigerConnection interface. The 'Query Builder' tab is active, displaying the SQL query for problem 12. The 'Query Result' tab shows the output of the query, which is a table with three columns: ORDER\_NUM, NAME, and CITY. The results are sorted by Order\_Num in ascending order. At the bottom, it indicates that 8 rows were selected.

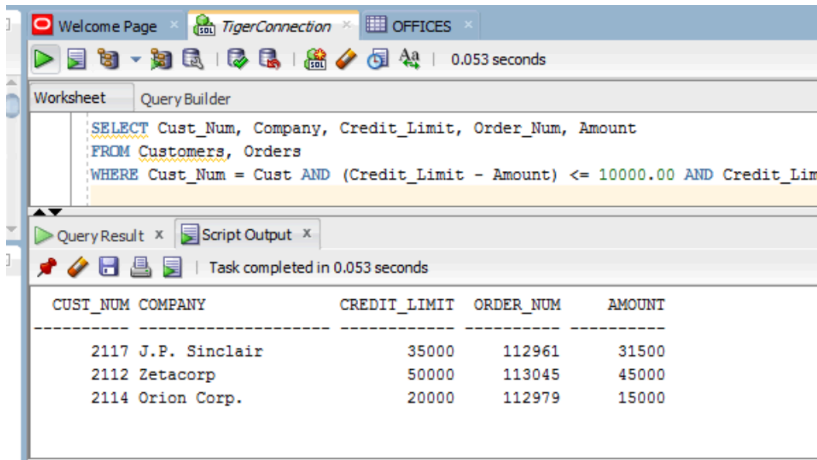

ORDER_NUM	NAME	CITY
112968	Dan Roberts	Chicago
112997	Nacy Angelli	Denver
113062	Nacy Angelli	Denver
113069	Nacy Angelli	Denver
112975	Paul Cruz	Chicago
113055	Dan Roberts	Chicago
113057	Paul Cruz	Chicago
113042	Dan Roberts	Chicago

8 rows selected.

13) List all customers (Customer number, Company, and Credit Limit) and orders (Order Number, Amount) where the Amount is within \$10,000 of the Credit Limit. Therefore:

- Credit\_limit should be greater than zero and
- Amount should be greater than zero and
- Amount should be less than credit\_limit and
- Credit\_limit – Amount <=\$10000

```
SELECT Cust_Num, Company, Credit_Limit, Order_Num, Amount
FROM Customers, Orders
WHERE Cust_Num = Cust AND (Credit_Limit - Amount) <= 10000.00 AND Credit_Limit > 0.00
AND Amount > 0.00 AND Amount < Credit_Limit;
```

The screenshot shows the TigerConnection interface with a query window containing the following SQL code:

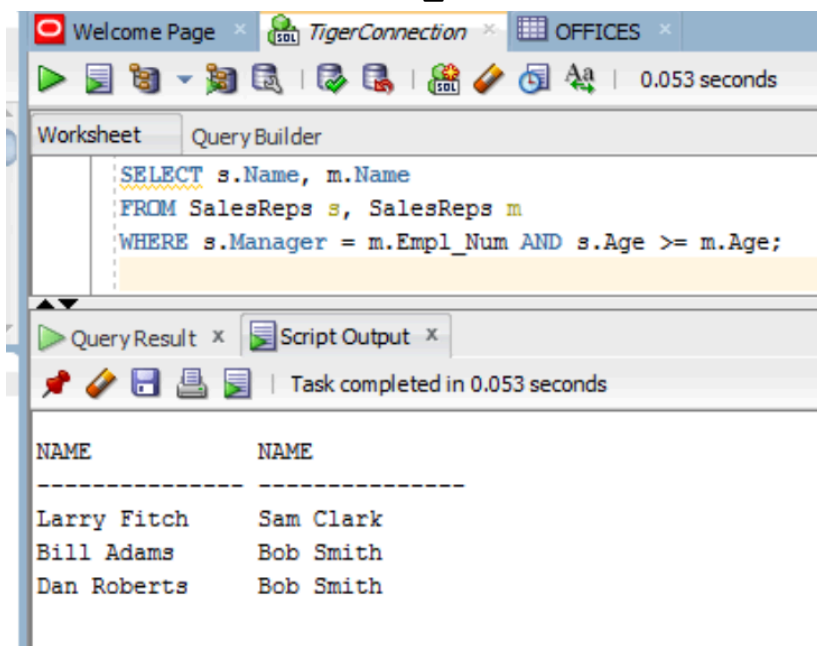

```
SELECT Cust_Num, Company, Credit_Limit, Order_Num, Amount
FROM Customers, Orders
WHERE Cust_Num = Cust AND (Credit_Limit - Amount) <= 10000.00 AND Credit_Lim
```

Below the query window, the 'Query Result' tab displays the following data:

CUST_NUM	COMPANY	CREDIT_LIMIT	ORDER_NUM	AMOUNT
2117	J.P. Sinclair	35000	112961	31500
2112	Zetacorp	50000	113045	45000
2114	Orion Corp.	20000	112979	15000

14) List all salesreps names and their managers' names where the salesrep is at least as old as the manager. Duplicate rows are not allowed.

```
SELECT s.Name, m.Name
FROM SalesReps s, SalesReps m
WHERE s.Manager = m.Empl_Num AND s.Age >= m.Age;
```

The screenshot shows the TigerConnection interface with a query window containing the following SQL code:

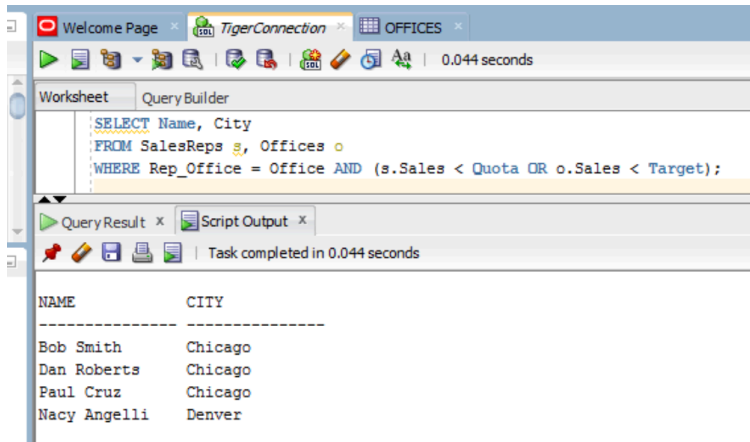

```
SELECT s.Name, m.Name
FROM SalesReps s, SalesReps m
WHERE s.Manager = m.Empl_Num AND s.Age >= m.Age;
```

Below the query window, the 'Query Result' tab displays the following data:

NAME	NAME
Larry Fitch	Sam Clark
Bill Adams	Bob Smith
Dan Roberts	Bob Smith

15) List all salesreps (Name) and the City they work in where either the sales of the salesrep < Quota or the sales for the office is < Target.

```
SELECT Name, City
FROM SalesReps s, Offices o
WHERE Rep_Office = Office AND (s.Sales < Quota OR o.Sales < Target);
```

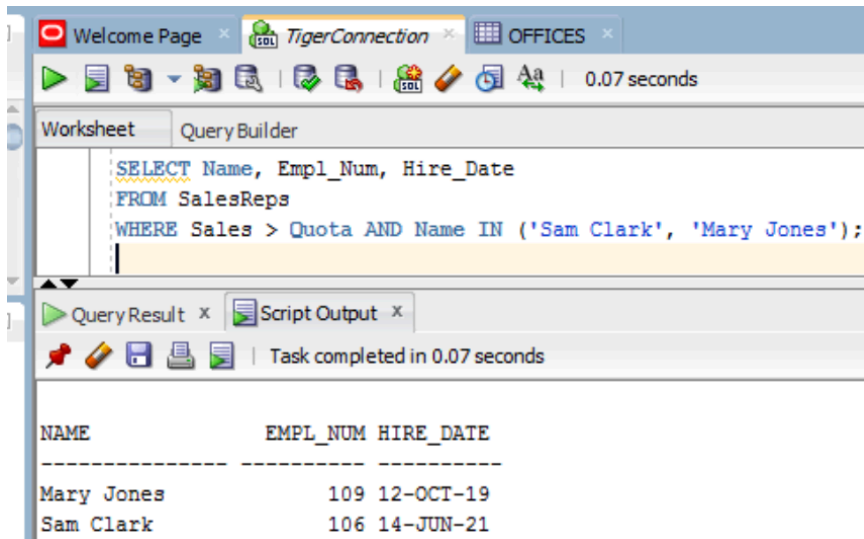

NAME	CITY
Bob Smith	Chicago
Dan Roberts	Chicago
Paul Cruz	Chicago
Nancy Angelli	Denver

16) List the name, ID, and hire date of the salesreps where the following two conditions hold:

- a) The salesreps sales should be greater than the quota and
- b) The rep should be either "Sam Clark", or "Mary Jones."

```
SELECT Name, Empl_Num, Hire_Date
FROM SalesReps
WHERE Sales > Quota AND Name IN ('Sam Clark', 'Mary Jones');
```

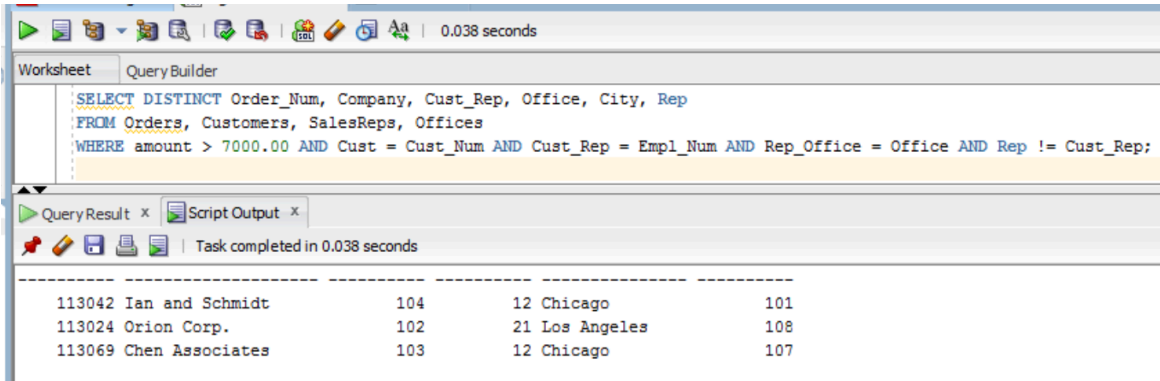

NAME	EMPL_NUM	HIRE_DATE
Mary Jones	109	12-OCT-19
Sam Clark	106	14-JUN-21

17) List all orders (Order Number) over \$7,000 showing the company placing the order, the Customer Rep assign to the company, the Office id and the city , and the rep who took the order where such that the Customer Rep's is not the rep who took the order.

```
SELECT DISTINCT Order_Num, Company, Cust_Rep, Office, City, Rep
FROM Orders, Customers, SalesReps, Offices
WHERE amount > 7000.00 AND Cust = Cust_Num AND Cust_Rep = Empl_Num AND Rep_Office = Office AND Rep != Cust_Rep;
```

The screenshot shows a SQL query builder window with the following query:

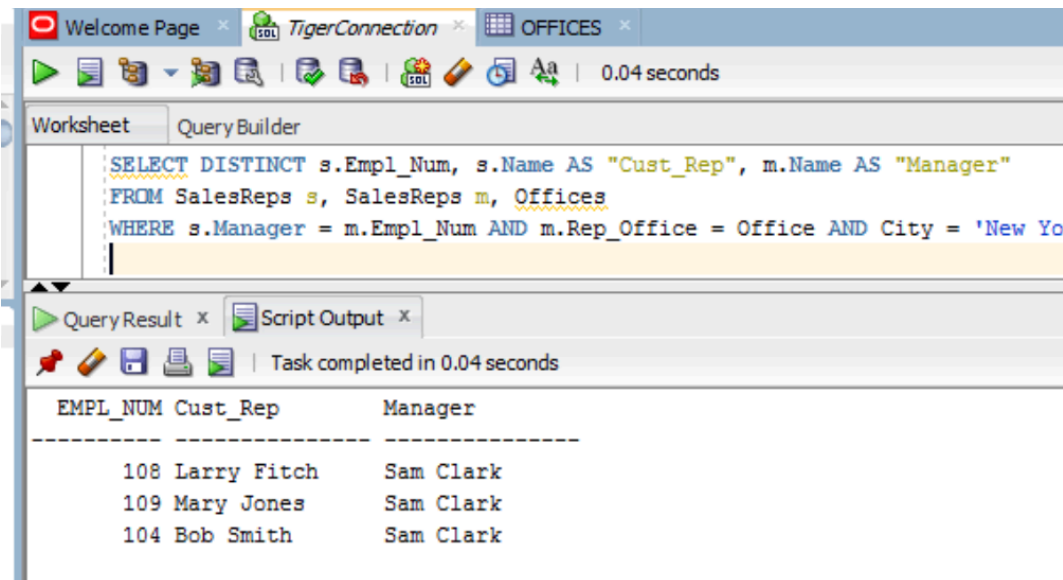

```
SELECT DISTINCT Order_Num, Company, Cust_Rep, Office, City, Rep
FROM Orders, Customers, SalesReps, Offices
WHERE amount > 7000.00 AND Cust = Cust_Num AND Cust_Rep = Empl_Num AND Rep_Office = Office AND Rep != Cust_Rep;
```

The query results are displayed in a table with 6 columns: Order\_Num, Company, Cust\_Rep, Office, City, and Rep. The results are as follows:

Order_Num	Company	Cust_Rep	Office	City	Rep
113042	Ian and Schmidt	104	12	Chicago	101
113024	Orion Corp.	102	21	Los Angeles	108
113069	Chen Associates	103	12	Chicago	107

18) List all customer reps (their name and their id) and their managers name in which the manager is based in New York. Use appropriate column header.

```
SELECT DISTINCT s.Empl_Num, s.Name AS "Cust_Rep", m.Name AS "Manager"
FROM SalesReps s, SalesReps m, Offices
WHERE s.Manager = m.Empl_Num AND m.Rep_Office = Office AND City = 'New York';
```

The screenshot shows a SQL query builder window with the following query:

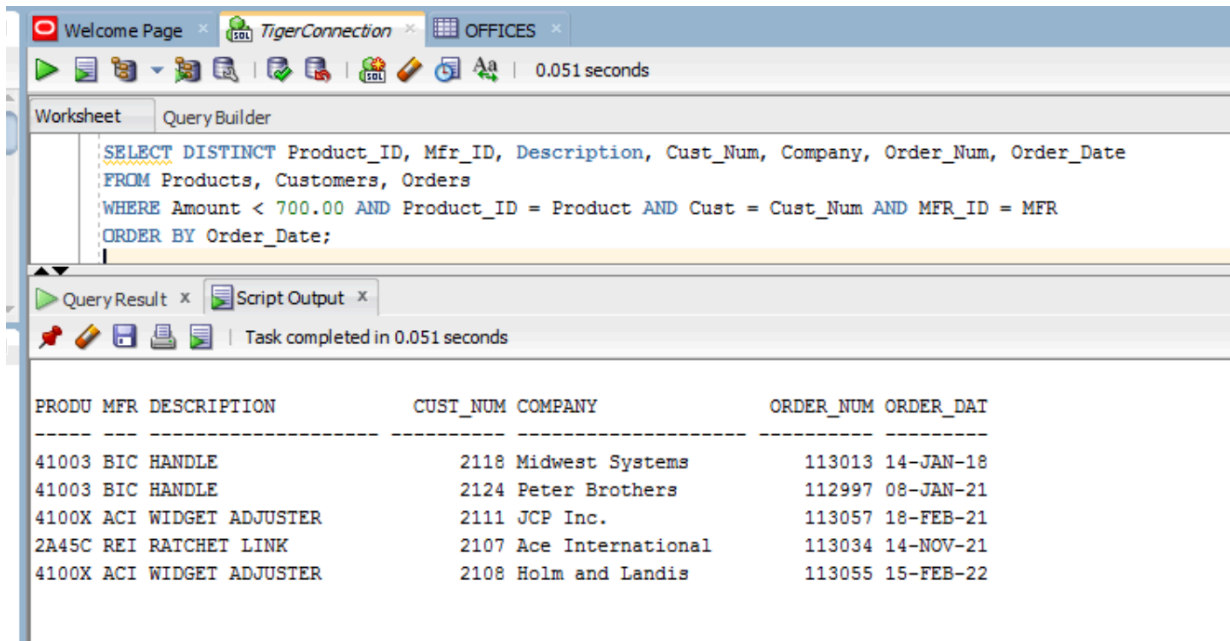

```
SELECT DISTINCT s.Empl_Num, s.Name AS "Cust_Rep", m.Name AS "Manager"
FROM SalesReps s, SalesReps m, Offices
WHERE s.Manager = m.Empl_Num AND m.Rep_Office = Office AND City = 'New York';
```

The query results are displayed in a table with 3 columns: EMPL\_NUM, Cust\_Rep, and Manager. The results are as follows:

EMPL_NUM	Cust_Rep	Manager
108	Larry Fitch	Sam Clark
109	Mary Jones	Sam Clark
104	Bob Smith	Sam Clark

19) List all products (ProductId, MFR\_Id, and Description), customers (CustNum, Company) who have bought that product, and orders (Order Number, and Order Date) where the order < \$700. Sort the rows by the OrderDate. Duplicate rows is not allowed.

```
SELECT DISTINCT Product_ID, Mfr_ID, Description, Cust_Num, Company, Order_Num,
Order_Date
FROM Products, Customers, Orders
WHERE Amount < 700.00 AND Product_ID = Product AND Cust = Cust_Num AND MFR_ID = MFR
ORDER BY Order_Date;
```

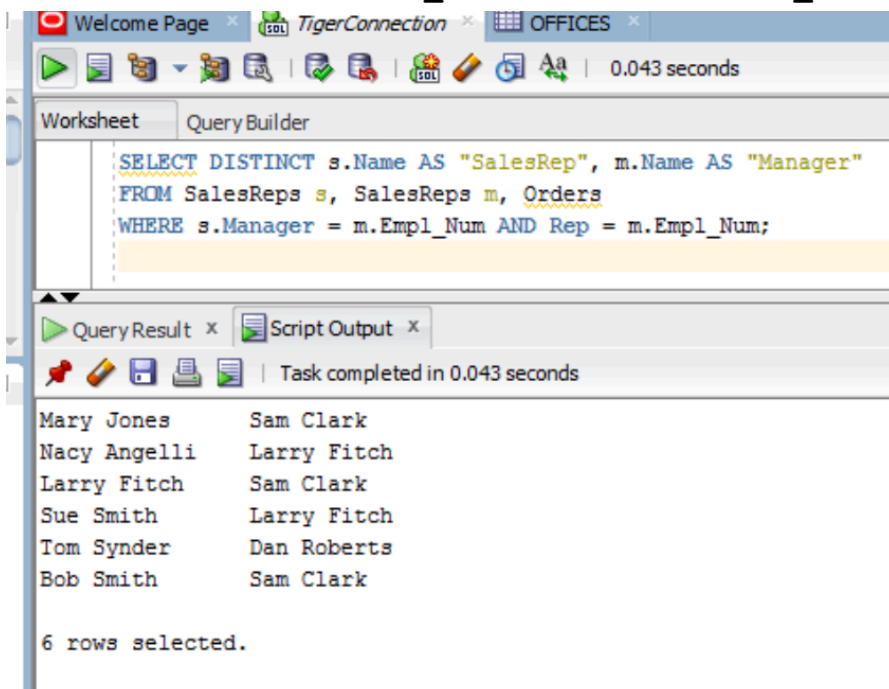

The screenshot shows the TigerConnection interface with a SQL query entered in the Query Builder. The query is:   
 SELECT DISTINCT Product\_ID, Mfr\_ID, Description, Cust\_Num, Company, Order\_Num, Order\_Date  
 FROM Products, Customers, Orders  
 WHERE Amount < 700.00 AND Product\_ID = Product AND Cust = Cust\_Num AND MFR\_ID = MFR  
 ORDER BY Order\_Date;

The Query Result pane shows the following data:

PRODU	MFR	DESCRIPTION	CUST_NUM	COMPANY	ORDER_NUM	ORDER_DAI
41003	BIC	HANDLE	2118	Midwest Systems	113013	14-JAN-18
41003	BIC	HANDLE	2124	Peter Brothers	112997	08-JAN-21
4100X	ACI	WIDGET ADJUSTER	2111	JCP Inc.	113057	18-FEB-21
2A45C	REI	RATCHET LINK	2107	Ace International	113034	14-NOV-21
4100X	ACI	WIDGET ADJUSTER	2108	Holm and Landis	113055	15-FEB-22

20) List the name of the salesreps and the name of their managers only if the manager has taken care of some orders.

```
SELECT DISTINCT s.Name AS "SalesRep", m.Name AS "Manager"
FROM SalesReps s, SalesReps m, Orders
WHERE s.Manager = m.Empl_Num AND Rep = m.Empl_Num;
```

The screenshot shows the TigerConnection interface with a SQL query entered in the Query Builder. The query is:   
 SELECT DISTINCT s.Name AS "SalesRep", m.Name AS "Manager"  
 FROM SalesReps s, SalesReps m, Orders  
 WHERE s.Manager = m.Empl\_Num AND Rep = m.Empl\_Num;

The Query Result pane shows the following data:

SalesRep	Manager
Mary Jones	Sam Clark
Nacy Angelli	Larry Fitch
Larry Fitch	Sam Clark
Sue Smith	Larry Fitch
Tom Synder	Dan Roberts
Bob Smith	Sam Clark

6 rows selected.
